

HADIYA ZUBERI

Cybersecurity Student — GRC · Threat Detection · Cloud Security

diazuberi56@gmail.com | +92 335 0256676 | diaz268.github.io | linkedin.com/in/hadiya-zuberi-b2ba31277

SUMMARY

Cybersecurity student with hands-on experience in governance, risk, and compliance (GRC), vulnerability assessment, network traffic analysis, and cloud IAM. ISC2 CC certified. Currently mapping organizational security policies to PTA CTDISR regulatory requirements and supporting VAPT engagements as a Governance Intern at Transworld Associates. Independently built and documented 10+ security labs spanning malware analysis, SIEM deployment, and incident response, all published with full reports on my portfolio.

EXPERIENCE

Governance Intern — Transworld Associates

Jun 2026 – Aug 2026

- Mapped organizational security policies to PTA CTDISR regulatory requirements, supporting compliance documentation and audit readiness.
- Supported VAPT engagements, including configuration reviews and vulnerability assessments across client systems.
- Identified and documented security control gaps against regulatory and ISO 27001-aligned frameworks.

Operations & Communications Intern — SHINE

Aug 2024 – Sep 2024

- Managed operational databases and coordinated communications across welfare partner organizations, ensuring accurate record keeping and timely information flow.

EDUCATION

Bachelor of Science in Cybersecurity — Air University, Kamra

Expected Sep 2028

Relevant Coursework: Network Security, Information Assurance, Cryptography, Operating Systems

INDEPENDENT PROJECTS (FULL REPORTS AT DIAZ268.GITHUB.IO)

Emotet + Qakbot Malware Analysis & Incident Response

2025

- Analyzed real-world malware PCAPs, traced C2 communication via TLS handshake analysis, confirmed payload delivery, extracted IOCs, and managed the full incident lifecycle in Jira.

Information Assurance Program — FalconPetro (CEO / Group Lead)

2025

- Led a 5-member team to design a full IA program for a simulated 350+ site company; authored 16 security policies, ran a risk assessment across 7 risk areas, and produced a Disaster Recovery Plan with defined RTOs and RPOs.

Cowrie Honeypot Deployment & Wazuh SIEM Integration

2025

- Deployed an SSH honeypot and integrated it with Wazuh SIEM via a custom JSON decoder and alert rules; captured 45 attack events auto-mapped to MITRE ATT&CK technique T1110.001.

AWS IAM & Access Control Implementation

2025

- Configured least-privilege RBAC policies and enforced MFA across an AWS environment; mapped IAM roles to real-world access requirements.

DoS/DDoS Attack Simulation & Traffic Forensics

2025

- Simulated SYN, ICMP, UDP flood, and FIN scan attacks in an isolated VM lab; performed deep packet analysis to distinguish malicious traffic from legitimate spikes.

Additional projects: Network Reconnaissance with Nmap · Windows System Hardening · Secure SFTP File Transfer · Linux Automation & Monitoring (Bash) · Keylogger Deployment via Metasploit · Phishing Awareness Campaign & Simulation — full write-ups on portfolio.

SKILLS & CERTIFICATIONS

Tools & Technologies: Wireshark, Nmap, Nessus, hping3, tcpdump, Metasploit, msfvenom, Jira, AWS IAM, Wazuh SIEM, Kali Linux, Ubuntu, VMware, WinSCP, OpenSSH, Bash

Frameworks: NIST, ISO 27001, PTA CTDISR, MITRE ATT&CK

Certifications: ISC2 Certified in Cybersecurity (CC) · Google Cybersecurity Certificate · Cisco Introduction to Cybersecurity · AI & ML Bootcamp — Udemy (in progress)
